

COMPLETE PRODUCTION SYSTEM

Some examples of Machinery and industrial Plants:

Brass rods sawing Machine
Induction and gas heating furnace for the brass billets
Hot melting furnace
Several kinds of Hot Forging presses (mechanic, hydraulic, electronic)
Gravity and low pressure die casting Machines
Hot Box Core Machines
Graphitizing Machines
Trimming presses
Casting runner Machines
Shot blasting Machines
Sand blasting/shot peening Machines
General Transfer Machines
CNC machining Centers
Asserving Robots
Industrial washing and degreasing Machines
Galvanic Plant
Laseregraving
Automatic Assembly and testing lines (for valves, fittings and taps)
Automatic Assembly and testing benches and instruments
Automatic packaging Machines
Air and fume extraction system
Customized dies and equipments (for brass, aluminum and polymers product)
Several kinds of customized tools
Several kinds of Instruments (measuring, controlling)
Spare parts for machinery
Completely overhauling and modernization of the machines
Highly qualified befor and after sales assistance
Remote service via PC

COMPONENTS FOR DOMESTIC AND INDUSTRIAL WATER AND GAS-HEATING SOLUTIONS

Some examples

Small turned parts
Wide range of fittings
Adopters
Ball valves, shut-off valves, safety devices
O-rings, gaskets,
Covers, rosettes
Taps and fitting patrs
Sanitary faucets (tradizional and thermostatic)
Temporized taps
Headworks

Handles in brass, zamak

Wide range of flexible hoses for faucets and plumbing

Several kinds of showers

Pipes and multiproposal or special spouts

...and numerous other components/accessories for our customer's final production
